Moulded Seat Insert

Our moulded seat insert (MSI) can offer accommodation for severe and complex postural needs for clients of all ages. The foam density used is chosen depending on both the level of control required by the user, and the specification of the clinical team.

The main characteristics of the moulded seat inserts are:

- Moulded seat shell available in various colourful designs
- Provides excellent accommodation of complex seating presentations with good weight distribution and pressure management
- Can be interfaced into most types of wheelchair and mobility base
- Approved for use in transportation
- Easily removed from host wheelchairs
- Robust and lightweight
- Bespoke seated areas of pressure relief and ventilation
- Two liners provided as standard, with additional growth liners available
- Washable loose covers available in a number of fabrics and colours; easily removed for cleaning and maintenance
- Full range of accessories available
- Approved for transportation and satisfies the requirements of ISO16840-4

Features

Excellent accommodation
with good weight distribution
and pressure management

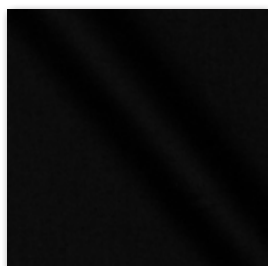

**Inbuilt growth to allow for
longevity**
and to accommodate changes
to body mass

Robust
lightweight and
durable
